Company/ History

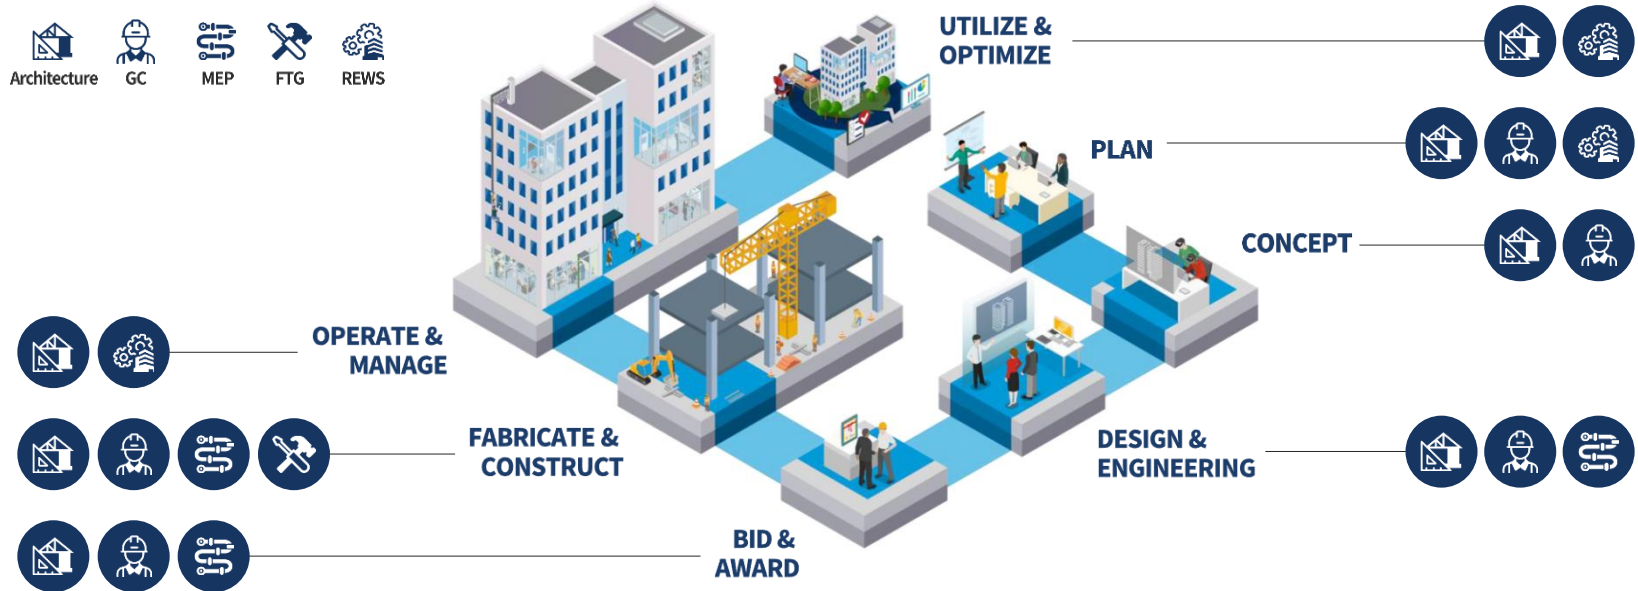

BuildingPoint Korea is a specialized company introducing Trimble's BIM solutions to the domestic market.

As a **provider of Trimble's BIM solutions** of contributing to the **productivity improvement** in the industry, BuildingPoint Korea **leads the Korean smart construction market**.

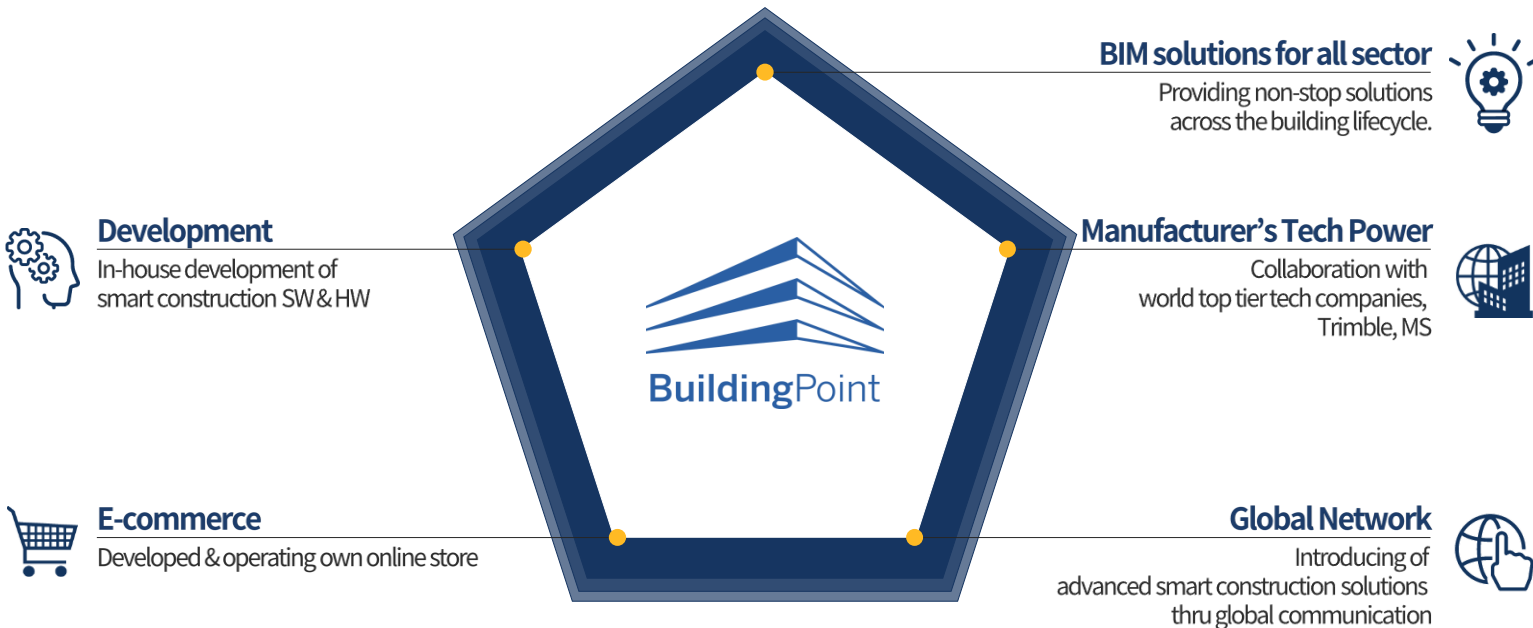

Company / Business

BuildingPoint Korea **provides specialized BIM solutions across all stages** of the Building lifecycle.

Business Competitiveness

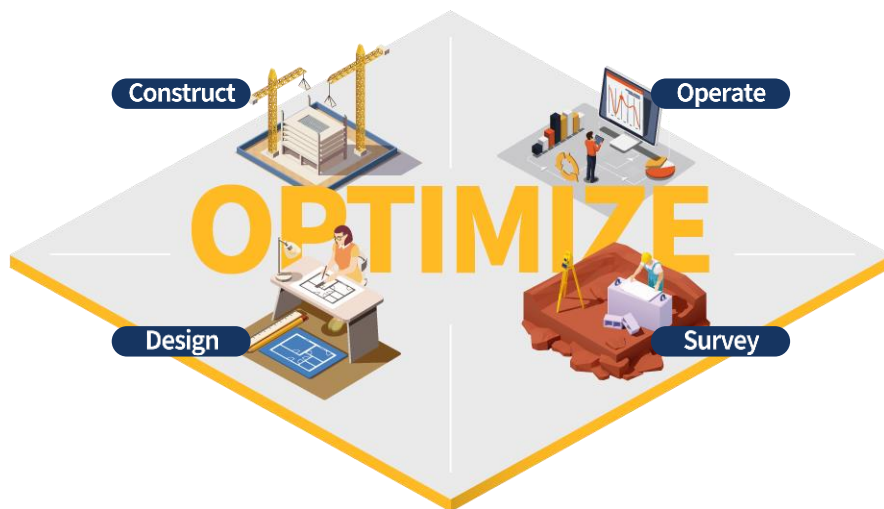

BuildingPoint Korea provides **differentiated competitiveness** in five aspects.

Business 1 /

Solutions for all BIM sectors

With BIM HW & SW from 3D to 7D across the entire building lifecycle, **optimizing customer workflows** and **providing a non-stop workflow solution** from the office to the field.

BIM solution Lineup from design – construction - operation

Utilizing and connecting data at any stage with a diverse **construction portfolio**, including SketchUp, 3D scanners, MEP layout, Trimble Connect, and more

Completing Smart Construction workflow

With the goal of enhancing productivity, efficiency, and cost savings, aiming to introduce innovative solutions based on customer experience, **setting standards in the global construction market** and **presenting the future direction for the construction industry**

Business 2 / Manufacturer's Tech Power

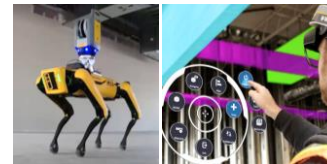

Deliver the **Future** of Construction **Now**

We **offer innovative building solutions by combining the technological expertise of Trimble**, a global leader in spatial information. Trimble proposes cutting-edge solutions that enhance productivity in the construction industry through collaboration with global innovative enterprises.

Trimble's expertise in spatial technology takes BIM solutions to the next level, as **supporting to enhance customer productivity, quality, safety, and sustainability**. This contributes to increased productivity in the construction industry.

Trimble collaborates with global innovative companies such as MS, Boston Dynamics, Google, etc., to lead the construction industry with new solutions. **BuildingPoint introduces the solutions in Korean market.**

 **Trimble**
TRANSFORMING THE WAY THE WORLD WORKS

Trimble is **the world's leading spatial technology specialist**, offering innovation and technology for the future, based on 3 fundamental principles: Position, Information, and Communication.

Business 3 / Global Network

As part of the BuildingPoint network,
we **introduce smart construction solutions to the Korean market**
in line with the global standards of the construction industry

BP Korea provides a strategic BIM Solutions leading the **global construction industry**, aiming to address the losses and inefficiencies that have occurred in the domestic construction sector.

BuildingPoint is Trimble's building portfolio specialized brand, establishing over 10 locations worldwide in Australia, the Americas, Asia, and Europe to create a **global network**.

Business 4 / Development

Leading the smart construction market with in-house developed SW & HW

Development of Korean-Specific solution

In-house development:
Smart Drilling Robot Prototype
Smart Con. Challenge2021 Innovation Award

Through in-house research and development, we are developing Korean-specific solutions for the domestic market, for both hardware and software. **By the needs of professionals in Korea, we aim to contribute to the automation and productivity enhancement of construction sites thru BIM workflows.**

Business 5 / E-commerce

Deliver the **Future** of Construction **Now**

Operating own online store, we offer subscription service to align market trend.

Developing own online store

From software to hardware,
We provide customers with overall Trimble building solutions

Faster Market Response

Through direct customer engagement via our
online store, we respond faster to the evolving
trends in the BIM market based.

Easy Access

Our online store is easily accessible to everyone
with convenient sign-in systems for purchasing
