

## CETEC COMPANY PROFILE

2020. 11. 11

LEADING GLOBAL CONSTRUCTION  
EQUIPMENT MARKET

## CEO Greetings

Cetec was established in 2006 and is specialized in developing and production of undercarriage of the construction equipment. As the machine parts that we have imported before are produced by our own technology nowadays, Cetec can provide remarkable quality of products with competitive price that has contributed to the industry. Cetec always tries to improve safety of people through developing smart equipments and modularization applied to hybrid systems. And also we will never stop giving our effort to be more environmental friendly by using high-tech features. Eventually, we will make our neighbors happy as our final goal.

## Business

## Parts

Cetec has been developing and supplying undercarriage parts of the construction equipment. Especially, 'Rubber Track' and 'Rubber Shoe Pad' are the most likely patented products to succeed as the main commodities.

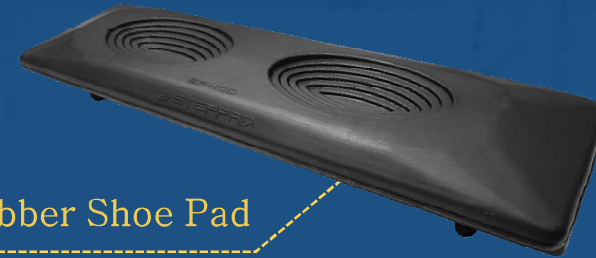

With those commodities we are waiting to enter the overseas market of Construction Equipment.

## Remanufacture Part

- ☒ Pump Motor
- ☒ Turning Reducer

## Rubber Shoe Pad

- Since it's designed Circle terraced form, the durability of product is visible and it helps you to manage product-lifecycle better.
- It is able to maintain the tractive force through it's large surface area.
- Increase productivity and curtail the cost of production by reduction of EDPM rubber.
